

OASIS V3 Quick Links Guide

Online Aerospace Supplier Information System® (OASIS) is an online resource for certification and registration data of aerospace suppliers. Containing a list of suppliers certified/registered under the IAQG rules to be in compliance with the aerospace quality management system (AQMS) requirements (9100 series), OASIS also contains all bodies involved in the process (i.e. National Accreditation Bodies, Certification Bodies, and Authenticated Aerospace Experienced Auditors).

The Platform maps the entire AQMS certification process and supports you as a certification body, supplier, auditor, or reviewer. The latest version of OASIS V3, released in July 2023, is built on an entirely new platform. To help you familiarize yourself with the system, please refer to this quick links guide:

OASIS V3 Frequently Asked Questions

Why is there a freeze period?

The freeze period is when all data and in-progress work is migrated to OASIS V3. This freeze will take up to two weeks to complete, ensuring the millions of data points from the previous OASIS versions are aligned with the new structure in OASIS V3 to make the data useful for gaining insights into standard usage, emerging trends, and developing issues requiring attention.

What about data collected during the Freeze Period?

No data can be entered or adjusted in OASIS throughout the two-week freeze period. To address this issue, the Certification Team released a resolution regarding an extended time for data collected during the freeze period. You may read the [resolution here](#) or find it published in the [IAQG ICOP Resolution log](#) and shared on the [OASIS V3](#) web page.

Is there a Service Desk available to users?

Yes, the Service Desk is provided by the vendor Intact, with a global team of support agents to cover Europe, US and Asia. Once OASIS is live, users can connect directly with the OASIS V3 hyper-care team via the [OASIS knowledge base](#). If you cannot find answers in the available guidance materials, you can open a ticket to receive support.

Can I use my current credentials to login into OASIS v3?

Since OASIS V3 is built on an entirely new platform, the system requires ALL users to create new login credentials. Most users will do a password reset to regain access to their login using their OASIS email address as their username (passwords are encrypted and cannot be transferred). Some users will have additional logins based on separate user roles. For these individuals, an invitation to the system will be generated.

What is the data retention between the old and new platforms?

OASIS V3 includes all relevant data, data history, and core functionality as required by the Standards with regard to retention.

Is there guided training for OASIS V3?

Self-guided training and video demonstrations are available in the [knowledge base](#).

Is there a demo site I can use?

There is no preview/demo area. However, we encourage you visit the [knowledge base](#) to see how the new platform will look and work.

Will the current OASIS be available/accessible after V3 launch?

Yes, OASIS NextGen will remain accessible in a read-only format for an indefinite but extended period as a reference.
